

KITCHENS AT THE PUSH OF A BUTTON

With CARAT, you have chosen a sophisticated graphic program, which provides kitchen planning at the highest technical level, with brilliant picture and colour quality. Where comparable systems of our competitors require long calculation times, CARAT only needs a few seconds. So you can "walk" through your planned kitchen, for example, in real-time. To have real fun using CARAT, we recommend you to use powerful, high quality hardware, at whose purchase you should consider the following.

SPECIAL OFFERS ON HARDWARE

Electronic and discount-stores often offer PC's with a wide range of equipment at a favourable price. We advise against buying such complete systems, because the sole components are often substandard, poorly harmonized with each other and inadequately pre-configured. In our experience this frequently results in unstable running and/or reduced performance of the system.

However: Not every kitchen expert is at the same time a hardware pro - doesn't have to be. The supply and maintenance of hardware should therefore be reserved for specialist companies. You should let a supplier assemble an individual system for you. We are happy to send you detailed technical information about the sole components and the network configuration. Take advantage of this service, so that designing kitchens with CARAT will be fun from the outset.

THE FOUNDATION FOR YOUR SUCCESS

- ➔ Processor: recommended **Intel**® Core2 Duo® or **AMD** Athlon Dual Core™ mit 2 GHz
- ➔ Memory: recommended 2 GB or more
- ➔ Graphic card: **Nvidia**® with CineFX™ or **ATI** with Smartshader™2.0 plus full DirektX® 9.0 and OpenGL-support, at least 512 MB graphic memory, hardware anti-aliasing, do not use Onboard graphic cards
- ➔ Monitor: At least a resolution of 1280 x 1024 or higher
- ➔ Data medium: Hard drive with 80 GB, DVD-drive
- ➔ Operating system: Windows 7, Windows® XP, Windows Vista – no "Home" Version
- ➔ Printer: for colour printing from 2400x1200 dpi, black/white from 600 dpi
- ➔ Internet: ISDN or DSL-connection
- ➔ Data transport: USB flash drive or similar removable data medium
- ➔ Data backup: removable data medium, tape drive, DVD or CD writer, or similar

FINALLY AND MOST IMPORTANTLY

CARAT runs on less powerful computers as well -then however with reduced performance. If you already have a PC, please contact us. We will be happy to analyse your hardware and will give you advice about exchanging sole components where applicable.

In any case:

To ensure the smooth operation of your computer, please unconditionally coordinate the configuration of hardware and network with us!
